1. The Information Disclosure Statements submitted by Applicant on December 4, 2003, February 26, 2004 and October 23, 2006 have been received and fully considered.
2. Claims 1-20 are pending.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsuruda (U.S. Patent No. 6,577,534).

Tsuruda discloses in Figure 1 a non-volatile memory device [100] comprising a memory cell array [140] coupled to a sense latch circuit [130] (column 8, line 28) to read data from the memory array [140]. The data read by the sense latch circuit [130] is latched into a data latch circuit [120] (column 8, line 21). A data control circuit [90] outputs the data latched in the data latch circuit [120] via a main amplifier [110] to an input-output circuit [80] (column 8, lines 18-19). The sense latch circuit [130] would be considered as the claimed decoder since it is used to read the data stored in the memory cell array [142]. The data path between the memory array [140] and the input-output circuit [80] would be considered as the claimed transfer path.

5. Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 7-20 are allowed.

7. The following is an examiner's statement of reasons for allowance:

The prior art failed to show or suggest the decoder decodes the data immediately after being outputted from the latch circuit as in claim 4, or the transfer path is constituted of a shift register and the data is transferred in serial as in claim 5, or the decoder has a function to detect an error and correct the error in the data as in claim 6, or the encoder as in claim 7-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

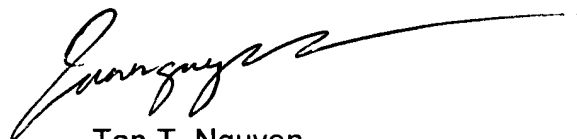

Fedde et al., Choi et al. and Kawakami are cited to show memory devices having data latch.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan T. Nguyen whose telephone number is (571) 272-1789. The examiner can normally be reached on Monday to Friday from 07:00 AM to 03:00 PM.
